

# Adult breathing systems for transport ventilators

Critical Care • Breathing Systems

Quality, innovation and trust

### Adult breathing systems for transport ventilators

We offer a range of disposable adult transport breathing systems for use with the majority of transport ventilators for inter departmental and inter hospital patient transport or transfer. Set up ready for use, straight from the pack, they use a selection of valves and flow sensors designed and validated for the appropriate ventilators, as shown.

The Oxylog<sup>®</sup> VE300, 3000, 3000 plus and 2000 plus systems also feature an over moulded connector block for the flow sensor lines, ensuring secure connection and correct orientation of the two lines.

#### HAMILTON®-T1

| Code      | Description  | Box Qty. |
|-----------|--|----------|
| 2930000 👁 | 30 mm Flextube™ transport coaxial breathing system with flow sensor. ≥ 1.8 m | 12       |
| 2300000   | 22 mm Flextube breathing system with flow sensor. ≥ 1.6 m                    | 10       |
